Degree	:	Master.
Year	:	1978.
Abstract	:	
<p>Twenty five patients who received physiotherapeutical treatment accompanied with medical treatment showed significant improvement as shown by pulmonary function testing while the other group (25 patients) that received medical treatment only showed insignificant amelioration in comparison . It is concluded that physical therapy accompanied with medical treatment was of supplemental value in the management of patients with obstructive air way disease .</p>
